

Dr. Sunil K. Singh
Chief Technology Officer, Engineering
GlobalLogic

Dr. Sunil K. Singh is a technologist with a distinguished career and hands-on experience in conceptualizing, designing, building, and launching innovative technology products and services. As CTO – Engineering, Sunil oversees GlobalLogic's overall Delivery Excellence charter, including Horizontal Practices (for driving technical expertise in Delivery and customer engagement around modern technologies) and Global Delivery Assurance.

Prior to joining GlobalLogic, Sunil was the Managing Partner at Citadel Ventures, a venture investment arm and technology firm that incubated hi-tech startups in areas of big data analytics, AI, supply chain, and food delivery. Previously, he has held multiple executive roles in technology organizations. As the President and CTO of Greenfence, he worked with the world's top retailers, food manufacturers, and certification bodies to create a technology platform for supply chain transparency to source with compliance verification automation. He also previously served as Globallogic's APAC Head and MD of India. As CEO and CTO of Informance, he defined a new category of operational analytics SaaS platform for Manufacturing Intelligence, and led the company to a successful exit in a PE transaction. Other innovative products he's helped launch include an adaptive learning platform for lesson delivery over connected tablets, UCCNet (the demand-supply synchronization platform for CPG companies), and robotic medical devices.

Sunil received his Ph.D. from Cornell University and his B.Tech. from IIT Kanpur. He has held faculty appointments at universities such as Dartmouth and Rensselaer Polytechnic Institute (RPI), and he holds patents in virtual reality and robotic surgical devices. In his spare time, Sunil is a voracious reader and also enjoys playing tennis and watching movies.
