

Bill Allison
Global Technology Leader
Deloitte

Bill currently serves as the Global Technology Services Leader, responsible for the delivery of full life cycle technology services to our clients on a world-wide basis. A principal with Deloitte since 1999, Bill has more than 25 years of experience in the analysis, design, and implementation of information systems, systems strategy, and business process improvement and has worked with some of the largest, most complex technology clients in the world. Currently, he acts in a risk and advisory role on many of Deloitte's most significant engagements.

Bill's vision for Global Technology Services is to deliver world-class, value-added and highly differentiated services in Enterprise Applications, Technology Advisory, and selected IT Outsourcing services where we have chosen to compete.

Prior to his current role, Bill has held numerous leadership positions including serving as the National Managing Director for Enterprise Applications, where Bill ensured that Deloitte exceeded our clients' expectations through high quality engagements, strong relationships with vendors, and highly talented and capable practitioners. He also held the role of Regional Managing Director for Deloitte in the United States' Pacific Southwest, where he oversaw significant, profitable growth in the region. Prior to his leadership positions, Bill was a Consulting Principal in Deloitte's Midwest Region of the U.S.

Bill has spoken at various internal and external engagements, all relating to his work with Enterprise Applications. Among those are the Global Analyst Summit, Enterprise Application Summit, and Global Technology Council meetings, as well as Deloitte DBrief webcasts for client executives on various Technology topics.

Bill earned a bachelor's degree in business administration from Illinois State University. Additionally, he attended the Northwestern University *Executive Program in Manufacturing Physics*.
