

David Awcock
Group Head, Technology
Group Technology and Operations (GTO)
Standard Chartered Bank

David Awcock is Standard Chartered Bank's Group Head of Technology, based at the Bank's Group Technology and Operations' Headquarters in Singapore. He has worked for the Bank since 1991.

Over this period, David's responsibilities have covered a wide range of technology needs across many business domains including Consumer Banking, Commercial and Institutional Banking, Private Banking, Asset Management and Trust businesses.

David was responsible for the Bank's earliest offshore development initiatives in India in the early to mid 1990s working primarily with India software majors, TCS and HCL. He also pioneered large-scale 'offshoring' of IT services within the Bank, establishing the Scope software centres in India and Malaysia that now employ more than 3000 systems development staff.

David led a major initiative to transform the Bank's Core Banking systems across the Bank's 50+ territories rolling out a next-generation J2EE, Linux based system, in a multi-year programme and has responsibility for all Technology services across Standard Chartered Bank globally and is engaged now in taking the Bank's Technology capability to the next level in support of the Bank's growth.

David has over 25 years of international experience in the IT and Financial Services sectors working previously for PA Consulting Group and International Computers Limited.

He is a member of the Chartered Management Institute.
