

Sangeeta Patni
Extensio

Sangeeta, an accomplished technology and business leader, has more than 25 years of experience in building, selling and deploying enterprise software. After spending 15 years in Corporate IT, she started her entrepreneurial journey in the year 2000, when she left her plum position as a Chief Information Officer of Eicher Motors, to co-found Extensio Software, Inc, a company focused on making enterprise information available on every interface and every user.

In Extensio, she has created a technology company that has built world-class enterprise software products that run in globally renowned companies such as ACC, Ambuja Cement, Rediff.com. and Johnson and Johnson. She built the company from grounds up, and under her leadership, her company, Extensio and its young team of engineers in Bangalore and Nagpur have built market leadership for its patented information delivery products within the Indian region.

Besides being passionate about making enterprise applications easy to use and available for all users, she is also passionate about "Made in India" software products, and dreams of seeing Indian software products deployed in enterprises across the world.

Sangeeta is an Electrical and Electronics Engineering graduate from BITS, Pilani, and holds a Masters in Electronics in Control, also from BITS, Pilani.
