

Venugopal N

**Security Engineering Director – India and SAARC
Check Point Software Technologies Ltd**

Venugopal is a 20 year technology veteran with extensive industry experience in networking, mobile security, IoT, middleware technologies, big data and analytics platforms. He spent the last 15 years at SAP as pre-sales, acquisition, project development and management specialist.

At Check Point, in addition to focusing on mobile device management security and securing things in the IoT world, Venu helps customers architect a proactive security strategy taking into account enterprise wide business applications built around SAP and Oracle platforms. He champions Advanced Threat Prevention and Proactive Risk Management best practices amongst large enterprise customers to secure strong visibility and understanding of Check Point solutions in these spaces.
