

**Rohit Jetly**  
**Director**  
**Fidelity International, India**

Rohit has around 20 years of experience in the Technology industry and he heads the UK & Continental Europe Financial Services Technology portfolio in India since January 2017. Rohit is also leading the definition and rollout of Technologies' global delivery operating model with heavy focus on DevOps and agile, aiming to simplify and improve how Technology delivers solutions globally at Fidelity.

Rohit joined Fidelity in 2011 and until 2013, he was responsible for the delivery of a set of key strategic programmes that involved global implementation of Fidelity's investment management front and mid office systems. In Dec 2013, he was made responsible for the Investment Management, Investment Services and Fund Accounting Technology teams in India, which included managing the entire life cycle of alpha generation and building key strategic data platform for our investment business. This also included transforming how well we deliver leveraging automation, cloud and other engineering constructs. In Jun 2015, Rohit took on the additional responsibility of the Enterprise Technology in India which includes all of Fidelity's enterprise wide data platforms for both investment and product.

Before joining Fidelity, Rohit has worked for Sapient, McAfee and Infosys in various roles and with a heavy hands-on technology flavour including leading global delivery, Programme Management, Technical Architecture - based out of both India and the USA. Rohit has B. Tech from IIT Delhi and an MBA from MDI Gurgaon.
