

**Ashwani Nandini****VP Delivery,
Globallogic**

With over two decades of experience in IT and product development services, A. Nandini leads operations and delivery at GlobalLogic's Noida, India location. With over 1600 employees, Noida is GlobalLogic's largest engineering delivery center in India.

In her role as Vice President of Delivery, Nandini manages complex technical and commercial projects and oversees the centre's end-to-end delivery services and profitability. She plays an instrumental role in GlobalLogic's pre-sales process, and she has extensive experience ramping up large engineering labs. As a result of her management skills, Nandini's teams have demonstrated consistent growth and have received accolades across multiple markets.

During her career at GlobalLogic, Nandini has won multiple CEO Awards for sales support and leadership excellence. She has established Noida as an excellence centre for Big Data, Analytics, Cloud, and Mobile technologies, and she has grown the company's business across eCommerce and Telecom verticals. Nandini has also nurtured the Noida design group, which plays a pivotal role in design-led engineering. By integrating design and engineering roles, Nandini has significantly enhanced team productivity and increased customer satisfaction. She is also actively involved in global strategy initiatives, from organizing proof-of-concept contests as part of GlobalLogic's Innovation Seeding Group (an employee idea incubator) to managing the delivery talent pipeline for the company's thirteen global engineering centres.

A topper at Delhi University, Nandini pursued her B.Sc. in Mathematics and later pursued her MCA from Delhi University. She is a frequent speaker at technology conferences hosted by thought leadership groups such as NASSCOM, Times Group, and SiliconIndia.
