

Cynthia Srinivas

**Engineering Leader
Intuit**

Cynthia Srinivas is a Technology professional with over 25 years of experience in product development and delivery in networking, storage, tele communication, infrastructure and customer experience domains. She is presently the Director for Product infrastructure at the Intuit India Development Centre. Her current charter includes hosting and delivering infrastructure (including systems engineering, software development and automation) to meet application demands and operational SLAs. Her role includes ensuring high availability and uptime of Intuit's Core Product offerings and Enterprise Business Applications, through infrastructure performance and optimization.

Her professional record demonstrates her versatility and ability to lead in different technology domains and functional roles in companies, with varied work cultures. She has consistently received recognitions for organizational leadership, institutionalizing processes and building a healthy work culture, that have led to outstanding results from the teams she has led. Her work experience includes tenures with well known companies like Wipro, Motorola, Cisco, NetApp and [24]7 Innovation Labs prior to her role at Intuit.

She has been a member of the Core team for GHCI as well as a panel speaker at the early Grace Hopper Conferences in India. She was profiled in ABI's Senior Technical Women's newsletter in January, 2012. She is presently the leader for the Technical Women community at Intuit in Bangalore. Very recently, DQ Channels which is a subsidiary of CyberMedia, published a feature profiling her under the 'Women Power' section of the magazine.
