# FAQs

## 1. What are the best ways to reduce the impact of Virus in the commercial space?

The bacteria, germs and viruses keep on multiplying as they spread. The coronavirus can live for hours to days on surfaces like countertops and doorknobs. Disinfection is by far the most viable option available. WHO has recommended certain disinfection and sanitizing measures to keep surfaces off the virus.

## 2. What is the Disinfection service by Urban Company?

Disinfection service for commercial spaces by Urban Company deploys WHO recommended chemical (Virex), a best in class machinery and top rated service professionals to carefully inspect, examine and disinfect all the primary areas and high touch points.

## 3. How is the Disinfection done?

A team of service professionals will come with all the necessary equipment and PPE. The service is done in 5 stages:

- Inspection of Office/Commercial space and instructions from the service professional

- Assembling all chairs at one place and ensuring removal of dust particles wherever possible
- Fogging/Fumigation of whole premise with ULV machine
- Spraying the chemical and Wiping all areas with Non-Woven cloth
- Re-Inspection and Feedback

## 4. How long should we wait before entering the disinfected areas?

Once the Chemical is applied on the surface, it dries out within 10 minutes. During this period of time, all the germs are eliminated. However, it is advisable to stay away from the premises and not touch the disinfected area atleast for 1 hour post service.

## 5. What all is covered under this service?

The service covers all the main areas in offices including the pantry (shelves, floor, appliances), halls and meeting rooms, all floors (wooden, marble, carpet), washrooms, furniture (chairs, desks) and high touch point areas (switchboards, door handles, taps etc).
