DISRUPT THE CORE

While leaders agree that digital transformation is critical, 70% of digital initiatives are likely to fail, according to leading consultants. What's needed is a digital core – an enterprise-wide transformation that rethinks the core across people, processes, and technology.

The impact of digital is no more restricted to enhanced customer experience and front-end functions. Digitization has gained precious ground to embed itself in core business functions as well. Almost all the major industries like IT, BFSI, Automobile, Retail & Manufacturing are leveraging digital to run their core processes. At the same time, digital technologies are enabling governments all around the world to rethink the way they deliver services.

Driven by speed, accuracy, faster go-to-market and to remain competitive in Industrial 4.0, digital is enabling the fusion of the two worlds – physical & virtual.

The Conference theme - Amplify Digital: Disrupt the Core will showcase latest trends, technologies, use cases and strategic discussions on building the digital future.

keythemes

BRACING FOR IMPACT

BIG SHIFTS AND DISCONTINUITIES – CREATING A NEW WORLD ORDER

Disruptive Tech- AI, VR, Blockchain, IoT, Data

Glocalization- Boundaries in a flat world

Digital First- Citizens and consumers

The 4th Industrial Revolution
